CAREER OBJECTIVE:

Looking for opportunities to leverage my professional experience and to continue my career by working and learning. I want to utilize my Technical Skills to benefit mutual growth.

SKILLS:

Technical/Software Skills
React-Native, React- JS, Redux
Google Analytics, Pendo

Tools Used
XCode, Android Studio, Visual Studio, GitHub

PROFESSIONAL EXPERIENCE: -

React-Native:

Project: - Slot Booking (Feb 2022 - May 2022)
Description - This app enables drivers of registered organizations to see their bookings. Drivers can mark the bookings as departed and delayed. They can download the pdf of their bookings and if they are not able to find the warehouse they have to report, they can navigate to that warehouse on a button click.

React-Js:

Project: - Slot Booking (Sept 2021 - Feb 2022)
Description - This Website enables users to book a warehouse for their goods. It has various screen according to the user logged in. Users can pre book the warehouse, cancel the booking, download booking PDF, edit the booking and many other based on the role of the user.

Project: - RMS (July 2022 - Present)
Description – This Web App was built for the courier centers to manage all the parcels that they receive at their center. They can return the parcel if delivered to the wrong center. Payment implementation was also there.

Project: - FreeLancing - Track Data (Jan 2021 - March 2021)
Description – Website enables the organization to track their marketing and selling data. It uses Google Analytics and Pendo to track user engagement. Various views were there to see our data like Data Table and Cards.

Project: - FreeLancing - Create and Renew License (April 2021 - June 2021)
Description – Website enables the organization's employees to renew or create new License of people. Fingerprint Scanning was implemented in this.
